

When you return your lease vehicle, its overall condition will be evaluated. To help you distinguish between normal and excess (or chargeable) wear and use, we've developed a convenient Wear and Use Evaluator Card as well as some useful guidelines to aid inspection of your vehicle's condition. Inspecting your vehicle before you return it provides information that can help you avoid lease-end charges. Some vehicle damage may be covered by your insurance. Allow sufficient time before you return your lease vehicle for any claims to be processed and repairs completed.

- ▶ If you plan to use the Evaluator Card, be sure your printout is at full size and confirm ruler is accurate.

### Exterior Body Panels

Includes dings, dents, scratches (excludes holes)
